

-L D College of Engineering, Ahmedabad

Department of Information Technology

Academic Year :- 2021-22

GTU B.E. 7th Semester

3170001- Summer Internship

Subject / Topic : Python(Django)

Day 10:-

- This was our last days of this amazing internship. In this session we learned about databases and its applications.
- Django has a inbuilt support of mainly five databases.
 1. PostgreSQL
 2. MariaDB
 3. MySQL
 4. SQLite
 5. Oracle
- Then we learned how to connect MySQL and SQLite databases to our Django project and perform basic operations on databases with use of our Django application.
- Then we learned how make models and how to migrate into our connected databases.
- Then we learned how to perform CRUD operation separately. And saw how those work.
- Then we discussed some problems and errors which were coming to some student and solve them.
- Then we also discussed which are various platforms where we can deploy our Django project very easily.
- After that we jumped into Latest Technologies and discussed about them that which technologies are ruling market at present and also will rule in coming years.
